

veterans. In 1962-63, \$3.0 million was granted for homes for paraplegics and \$1.5 million for automobiles especially adapted for the disabled. The third, 4-percent gratuities on Veterans Administration housing loans, is now less than \$500 a year.

Grants under the fourth program—rural housing—began in 1950 and were also made in 1951 and 1952. After a lapse of several years, these grants were reinstated in 1961-62, and in 1962-63 they amounted to almost \$1 million. Under the program, grants of up to \$1,000 may be made to owners of rural housing who live on their own property for the minor repair or improvement of their homes.

Beginning in 1962-63, two additional programs appear in the series. The largest, in dollar terms, is for assistance to refugees in the United States. Started in the fiscal year 1960-61 for the benefit of the Cuban refugees, the program was first financed from contingency funds available to the President under the Mutual Security Act of 1954, as amended. It was paid for in 1961-62 from the President's contingency funds, under the Foreign Assistance Act of 1961. In 1962-63, however, a

regular appropriation was made to the Department of Health, Education, and Welfare, and \$39 million was expended for refugee assistance under Public Law 87-510. The other new program in the series is for assistance to certain repatriated United States nationals, including the mentally ill. In 1962-63, \$400,000 was expended in their behalf.

AGRICULTURE AND NATURAL RESOURCES

This group consisted in 1962-63 of the program for payments under the Sugar Act and four conservation programs. Payments under the Sugar Act declined 12 percent to \$69 million. Together, the conservation payments decreased 7 percent to \$537 million—\$306 million in connection with the remaining unexpired contracts under the conservation reserve (soil bank) program. Under a new land-use adjustment program, authorized in the Food and Agricultural Act of 1962, \$4 million was granted for the conversion of crop land into pasture, forest, wild-life habitat, and income-producing recreational uses.

Notes and Brief Reports

Disability and Old-Age Benefits, by State, December 31, 1963*

Benefits under the old-age, survivors, and disability insurance program were being paid at the end of 1963 to 827,000 disabled workers under age 65 and to 10,263,000 retired workers aged 62 or over. In the accompanying tables, the beneficiaries have been classified according to their State of residence¹ at the end of 1963. The tables also show the average old-age and disability benefits being paid in December 1963, as well as the percentage distribution of the beneficiaries according to the size of their benefit.

The year's growth in the number of beneficiaries

* Prepared in the Division of the Actuary.

¹ Data for American Samoa, Guam, Puerto Rico, the Virgin Islands, and foreign countries are excluded from the State comparisons made later in this note.

was substantial both for those receiving benefits because of disability and for retired workers. The number of disabled-worker beneficiaries increased by 86,000 or 12 percent, and the number of old-age (retired-worker) beneficiaries by 525,000 or 5 percent.

The average monthly amount for disabled-worker beneficiaries went up slightly—not more than a few cents—each month during 1963, and at the end of the year it was \$90.59 or 60 cents higher than the average a year earlier. The average old-age benefit also increased slightly each month, and by December 1963 it was \$76.88 or 69 cents higher than the average in December 1962.

The increases were the result of several influences. Most important, for both old-age benefits and disability benefits, was the continuing rise in the proportion of benefits computed on the basis of earnings after 1950. Another factor was the increase from \$4,200 to \$4,800 in the amount of

annual earnings creditable for years after 1958.

The average old-age benefit also reflected the rise in the proportion of beneficiaries whose benefits were computed under the provisions that permit as many as 5 years of lowest earnings and periods of disability to be excluded in calculating the average monthly wage. A counteracting factor, tending to hold down the average old-age benefit, was the large number of actuarially reduced benefits awarded during the year.

Monthly benefits of \$100.00–\$127.00 were being paid at the end of 1963 to two-fifths of all disabled-worker beneficiaries (table 1). Disability benefits in the \$70.00–\$99.90 range were going to 43 percent, and benefits of \$40.10–\$69.90 were being paid to 16 percent. About 2 percent of the beneficiaries were receiving \$40.00 a month—the minimum benefit amount payable.

More than a fourth of all old-age beneficiaries at the end of 1963 were receiving \$100.00–\$125.00

TABLE 1.—Old-age, survivors, and disability insurance: Number and average monthly amount of disability insurance benefits¹ in current-payment status and percentage distribution by amount of benefit, by State, at end of December 1963

¹ Payable to disabled workers under age 65.

² Beneficiary's State of residence, based on monthly benefit check address.

(table 2). Monthly benefits of \$70.00–\$99.90 were going to 29 percent of the group and benefits of \$40.10–\$69.90 to 27 percent. For about 11 percent of all old-age beneficiaries the monthly benefit was exactly \$40.00; for 6 percent the benefit was in the \$32.00–\$39.90 range because of actuarial reduction for retirement before age 65.

In 1963 as in the past, the highest disability benefits—an average of \$98.86—were being paid to beneficiaries living in Michigan. Beneficiaries living in Connecticut received the highest old-age

benefits—an average of \$85.93. The lowest benefits were going to beneficiaries living in Mississippi—an average of \$78.89 for disabled-worker beneficiaries and \$57.71 for workers retired because of age. Most of the other States, when ranked by size of average benefits, also retained the same relative position in 1963 that they had held in earlier years.

Benefits of \$100.00–\$123.00 were being paid to almost three-fifths of the disabled-worker beneficiaries in Michigan but to only about one-fifth of

¹ Beneficiary's State of residence, based on the monthly benefit check address.

those in Mississippi. Only 9 percent of Michigan's beneficiaries were receiving less than \$70.00, but for 34 percent of the beneficiaries living in Mississippi the amount of the disability benefit was \$40.00-\$69.90. Almost two-fifths of the old-age beneficiaries in Connecticut but only 8 percent of those living in Mississippi were receiving benefits of \$100.00-\$125.00. Benefits of less than \$70.00 were going to three-tenths of Connecticut's old-age beneficiaries and to almost three-fourths of those in Mississippi.
