a. Beginning in January 1978, the Bureau of Labor Statistics introduced a new price index for all urban consumers (CPI-U) for all items (1982-1984 = 100) that forms a continuous series with the earlier index for urban wage earners and for clerical workers as of December 1977.

Three technical changes in the definition of poverty are described in "Characteristics of the Population Below the Poverty Level, 1980," U.S. Census Bureau, *Current Population Reports*, Series P-60, No. 133: (1) Distinctions based on the sex of the family householder will no longer be made; (2) income thresholds for farm families will be the same as for nonfarm families of the same size and composition, and (3) the increased sample size will now permit separate poverty income criteria for families of 7, 8, and 9 or more persons. Separate criteria for these family sizes by number of children have been developed by the Social Security Administration for the base year 1978 on the same basis as the original poverty matrix for smaller family sizes, and then updated by means of the all-items consumer price index. The dollar thresholds for larger families beginning in 1980 are:

a. Aged family members who are neither the family householder nor the spouse of the householder. Official poverty classification is based on combined income of all related persons living together. Persons in this group are classified here on the basis of official poverty criteria for family income and on a comparison of their own income with official poverty criteria for elderly persons maintaining their own households. The hidden poor are other relatives in nonpoor households whose own income is below the official poverty line for unrelated individuals or married couples.

NOTES: Living arrangements as of March 2002.

Poverty status in 2001 as reflected by income of unrelated individual or family money income for year compared with official poverty income criterion for families of appropriate size and composition.

Table includes civilian noninstitutionalized population residing in the 50 states and the District of Columbia.

a. The guidelines are effective from the date of issuance (unless otherwise specified by a particular program using them).

b. Add this amount for each additional family member. Before 1973, increments between some of the smaller family sizes differed from the increment shown in the table. Beginning in 1973, the increment has been the same for all family sizes in each year's set of guidelines.

Separate figures for Alaska and Hawaii reflect Office of Economic Opportunity administrative practice beginning in the 1966–1970 period. The U.S. Census Bureau, producer of the primary version of the poverty measure (the poverty thresholds), does not produce separate figures for Alaska and Hawaii.

Before 1983, the guidelines shown are for nonfarm families only.
